TowerBrook's Private Equity strategy is to pursue control-oriented investments in large and mid-market companies, principally on a proprietary basis and often in situations characterised by complexity. These may include management/shareholder dislocation, a distressed parent company or an out-of-favour industry where we nonetheless identify attractive potential for significant growth. The success of our strategy depends on our ability to choose well, to buy well, to structure our investments appropriately and to harness the right expertise to unlock growth. Our team of seasoned investment professionals is complemented by a network of experienced advisers. We work in close partnership with them and with highly talented senior managers to optimise the performance of our portfolio companies.

TowerBrook's Structured Opportunities strategy leverages our experience and expertise to allow us to invest in opportunities that fall outside the investment parameters of our Private Equity strategy. We define structured opportunities as complex transactions incorporating contractual downside protection that take advantage of changing market conditions, or situation-specific events where traditional control-oriented Private Equity attributes may not apply. Our Structured Opportunities investment universe includes multiple asset classes, from stressed and distressed debt instruments in both primary and secondary markets to structured equity and structured assets.

TowerBrook has an Allocation Committee (the "AC") to address potential conflicts of interest between the private equity investment strategy and the structured opportunities investment strategy. The AC determines the parameters of investment allocations between the two strategies, reviews the allocations and resolves any conflicts of interests that may arise and cannot be solved by the TSO Investment Committee and the PE Investment Committee. The AC also assesses the effectiveness of TCP's investment allocation policies and procedures. The AC is co-chaired by Ramez Sousou and Neal Moszkowski, and in

addition comprises Filippo Cardini, Glenn Miller, Matthew Gerber and Abrielle Rosenthal. The AC meets at least once annually, and conducts a look-back analysis on the allocation of all transactions that have closed during the preceding year.

The Limited Partner Advisory Committee of each fund also reviews any matters involving a potential conflict of interest presented by the General Partner.

TowerBrook's written conflicts policy can be round in the Compliance Manual and Code of Ethics. Conflicts of interest that may arise among the various individual and organizations comprising TowerBrook, the TowerBrook Funds and other affiliated entities are monitored on a continuous basis by the CCO and TowerBrook's legal department. A written conflicts register is maintained, which is reviewed annually on a formal basis by TowerBrook's legal department, and assessed periodically by TowerBrook's Risk and Compliance committee. Each team member is required to disclose all outside commitments that involve a substantial time commitment or which could otherwise present an actual or perceived conflict of interest. The CCO also holds a one-to-one discussion with each team member at least annually to discuss any conflicts of interests relating to such person's outside activities. A summary of such discussions, as well as a risk assessment of the outside activities of each partner and employee, is presented to TowerBrook's Risk and Compliance Committee periodically for review and approval. TowerBrook's policies and procedures regarding outside activities can be found in the Compliance Manual and Employee Manual.

SG 07.2	For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.
The Firm	o's Management Committee formally considers Responsible Ownership and ESG-related issues on an annual basis.

Our deal teams and deal team leads are responsible for identifying, in cooperation with the portfolio company, any responsible ownership related issues. TowerBrook seeks to conduct robust reviews of potential ESG-related issues early in the investment process.

TowerBrook has a clear and consistent process that helps us scrutinise prospective investments, manage them responsibly and deliver sustainable results for our investors. Responsible ownership considerations are integrated into every stage of this process, and drive the development of policies, action plans and metrics for our portfolio companies. (see below)

### SG 07

Indicate the number of dedicated responsible investment staff your organisation has.

0

### Additional information. [Optional

### Initial Screening

TowerBrook seeks to conduct robust reviews of potential ESG risks early in the investment process. TowerBrook has drafted and continuously evolves a list of ESG Markers, including, but not limited to, certain industries or countries that present heightened ESG risk and investor sensitivities. Investment professionals reviewing potential opportunities in such industries or connected to such countries, or which otherwise could reasonably pose material ESG risks, must discuss any such issues with TowerBrook's Transaction Committee at an early stage in the investment consideration process. TowerBrook also seeks to engage with its preferred ESG consultants at an early stage in the investment consideration process to identify ESG-related risks and opportunities.

# Due Diligence

Once an early stage investment proceeds to due diligence, TowerBrook conducts ESG-related diligence targeted to the Company's industry and specific risk profile. TowerBrook has developed a standard ESG diligence request list to confirm a target company's level of compliance with TowerBrook's ESG policies and relevant legislation and regulation. Additionally, TowerBrook has developed a specific detailed ESG diligence request list for certain industries, such as consumer goods and manufacturing. TowerBrook's investment team members may also conduct site visits, as appropriate. TowerBrook's preferred ESG consultants would be retained during the diligence stage to conduct a fulsome ESG diligence review.

TowerBrook's due diligence processes are designed to ensure that material issues, including ESG, are addressed when considering and evaluating investment opportunities. TowerBrook seeks to undertake ESG due diligence on applicable private equity investments, including, but not limited to, those with industrial manufacturing capabilities. Environmental diligence typically comprises environmental Phase I site assessments, but this can be extended to include Phase II site assessment if necessary. TowerBrook may also conduct diligence on anti-corruption, data privacy, supply chain, safety and other governance matters, as appropriate. TowerBrook's due diligence process for structured opportunities investments may also take into account ESG considerations, as appropriate. During diligence, TowerBrook also extensively references key executives and non-executives affiliated with the company, testing among other things for integrity and ethical reputation to help shape our view of the broader company's culture and attitudes.

TowerBrook also retains outside consultants for ESG matters, as appropriate.PWC has been selected as TowerBrook's primary provider of ESG-related consulting services in the United States, and ERM has been selected as TowerBrook's primary provider of ESG-related consulting services in the UK/Europe.TowerBrook may also retain other specialist providers, such as Environ and Arcadis for environmental consulting.

# Transaction Closing

At signing, TowerBrook's legal team would ensure that investment or shareholders' agreements include, where practicable and applicable, detailed ESG clauses. Furthermore, the legal team seeks to draft such agreements so that they clearly outline how ESG matters would be handled during the life of the investment. Such agreements seek to document what the Portfolio Company commits to undertake in relation to ESG, and to give the TowerBrook funds future leverage should the portfolio company fail to implement what has been agreed. Additionally, such agreements establish specific mechanisms for monitoring ESG activities, such as information and inspection rights. The legal team and investment teams also work to verify due diligence findings via representations and warranties in the purchase agreement, and seek specific indemnification as appropriate.

# 200-Day Plar

In connection with TowerBrook's recent revision of its ESG policies, the 200 day plan for each portfolio company includes development and publication of an appropriate ESG policy and development of procedures to implement, monitor and test such policy. Each 200 day plan includes standard ESG items, as well as any specific ESG items identified during diligence as relevant for a particular target company. Individual portfolio company action plans are designed, where appropriate, to address any opportunities for improvement.

# Ownership

During ownership, ESG related risks are managed by the boards and management teams of the individual portfolio companies. Since TowerBrook invests in a wide range of sectors, ESG risks vary widely from company to company. In connection with its recent enhancement of Responsible Ownership policies,
TowerBrook now seeks to discuss the importance of ESG with each CEO of private equity portfolio companies, together with the Chair, who would have been separately instructed during onboarding with a Welcome Pack that explicitly addresses Responsible Ownership and the Chair's role therein. TowerBrook

intends to actively monitor ESG at the portfolio company level, ensuring that systems and resources are in place to enable ESG risks to be effectively managed and that each portfolio company assigns specific management responsibility for ESG operations. TowerBrook's approach to ESG has been to ask each portfolio company's Audit & Risk Management Committee to review regularly such ESG risks as are relevant to that company. This practice is now evolving to establish a dedicated ESG (or similar) committee on each portfolio board. Portfolio company management is encouraged to engage directly with third parties (such as suppliers, developers, and contractors) to verify sound ESG practices. Furthermore, TowerBrook seeks to ensure adequate training on ESG at the portfolio company level, which may include sensitivity/diversity training and supply chain management training.

Private Mandatory Indicate whether your organisation's investment activities are guided by a responsible investment policy / follow responsible investment quidelines Our investment activities are guided by a responsible investment policy Describe how your organisation outlines expectations on staff and portfolio companies' approach towards ESG issues in TowerBrook provided comprehensive ESG training to its investment teams during Q1 2017, in connection with the rollout of our revised Responsible Investment Statement and enhanced ESG policies and procedures. Furthermore, TowerBrook provided the PRI online training module to certain members of its investment teams. Finally, members of the Portfolio Group and TowerBrook Legal periodically provide training to deal teams on an ad hoc basis to help understand and identify the relevance and importance of ESG factors in investment activities. In 2018, TowerBrook intends to provide further Responsible Ownership training to the investment teams, which is expected to include a presentation by a third-party expert who can lead the investment teams in a discussion on best practice. TowerBrook also expects to provide training in 2018 to TowerBrook board appointees on how ESG ties to value creation. TowerBrook also provides training to senior management of its portfolio companies periodically that addresses ESG issues, covering relevant employee-related policies, sourcing policies, and environmental policies. TowerBrook also organizes periodic manager roundtables and/or conference calls, at which ESG features as a topic for discussion (together with anti-bribery, cyber, diversity, etc.). O ur investment activities are not guided by a responsible investment policy O We do not have a responsible investment policy Indicate if your most recent fund placement documents (private placement memorandums (PPM) or similar) refer to responsible ✓ Yes Policy and commitment to responsible investment ☑ Approach to ESG issues in pre-investment processes Approach to ESG issues in post-investment processes Approach to ESG reporting Describe how your organisation refers to responsible investment in fund placement documents (PPMs or similar). [Optional] TowerBrook's values stand at the core of our mission and are the foundation of our belief in responsible ownership. Our most recent PPM contains both our Values Statement and our Responsible Ownership Statement. The PPM also states that the Responsible Ownership Report 2017 is published on the TCP website: www.towerbrook.com/responsible-ownership/ and that a printed copy is available on request from TowerBrook. Our most recent PPM states that TowerBrook has a clear and consistent process that helps us scrutinize prospective investments, manage them responsibly and deliver sustainable results for our investors. The PPM states that responsible ownership considerations are integrated into every stage of this process, and drive the development of policies, action plans and metrics for our portfolio companies. The PPM states that our work in this area is not, and will never be, completed: our commitment to responsible ownership is a commitment to a journey, so our process is constantly evolving. Our most recent PPM states that, in our view, companies with proactive management of environmental and social issues and governance structures that facilitate accountability are better placed to perform well over the long term. Responsible ownership helps to reduce risk and volatility and to improve financial performance by reducing costs, driving revenue growth and enhancing brand value. One of the key indicators of responsible ownership is transparency. With that in mind, our most recent PPM states that we are developing metrics to help us track the achievements of our firm and our portfolio companies in promoting diversity, environmental responsibility, ethical conduct, employee engagement and community involvement. In June 2017 TowerBrook published its first Responsible Ownership Report. The Report is designed to help investors understand more about TCP's objectives and its progress towards them. The PPM states that future reports will be published regularly and will describe the development of our metrics and reporting processes as well as highlighting the work of our portfolio companies to build businesses that are fit to face the challenges of the future O No O Not applicable as our organisation does not fundraise cate whether your organisation made formal commitments to responsible investment in the, Limited Partnership Agreement (LPA) of r most recent fund(s), or through side letters when requested by clients. PF 04 1 Mandatory PRI 1 During due-diligence indicate if your organisation typically incorporates ESG issues when selecting private equity investments. ✓ Yes

### PE 05.2

Describe your organisation's approach to incorporating ESG issues in private equity investment selection.

Initial Screening

TowerBrook seeks to conduct robust reviews of potential ESG risks early in the investment process. TowerBrook has drafted and continuously evolves a list of ESG Markers, including, but not limited to, certain industries or countries that present heightened ESG risk and investor sensitivities. Investment professionals reviewing potential opportunities in such industries or connected to such countries, or which otherwise could reasonably pose material ESG risks, must discuss any such issues with TowerBrook's Transaction Committee at an early stage in the investment consideration process. TowerBrook also seeks to engage with its preferred ESG consultants at an early stage in the investment consideration process to identify ESG-related risks and opportunities.

Due Diligence

Once an early stage investment proceeds to due diligence, TowerBrook conducts ESG-related diligence targeted to the Company's industry and specific risk profile. TowerBrook has developed a standard ESG diligence request list to confirm a target company's level of compliance with TowerBrook's ESG policies and relevant legislation and regulation. Additionally, TowerBrook has developed a specific detailed ESG diligence request list for certain industries, such as consumer goods and manufacturing. TowerBrook's investment team members may also conduct site visits, as appropriate. TowerBrook's preferred ESG consultants would be retained during the diligence stage to conduct a fulsome ESG diligence review.

TowerBrook's due diligence processes are designed to ensure that material issues, including ESG, are addressed when considering and evaluating investment opportunities. TowerBrook seeks to undertake ESG due diligence on applicable private equity investments, including, but not limited to, those with industrial manufacturing capabilities. Environmental diligence typically comprises environmental Phase I site assessments, but this can be extended to include Phase II site assessment if necessary. TowerBrook may also conduct diligence on anti-corruption, data privacy, supply chain, safety and other governance matters, as appropriate. TowerBrook's due diligence process for structured opportunities investments may also take into account ESG considerations, as appropriate. During diligence, TowerBrook also extensively references key executives and non-executives affiliated with the company, testing among other things for integrity and ethical reputation to help shape our view of the broader company's culture and attitudes.

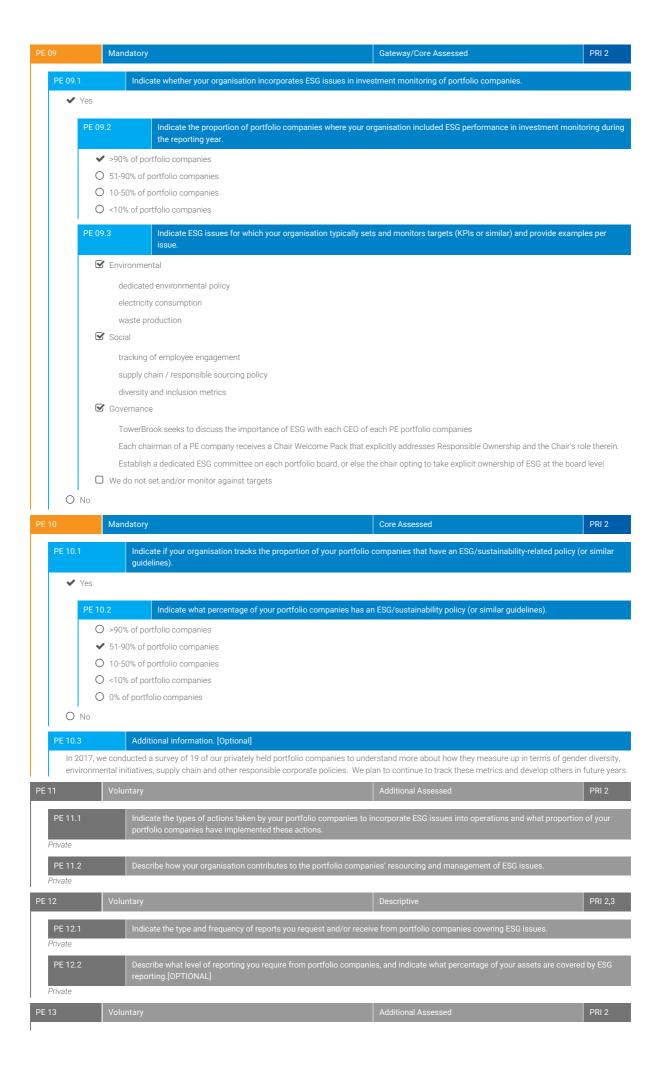

TowerBrook also retains outside consultants for ESG matters, as appropriate.PWC has been selected as TowerBrook's primary provider of ESG-related consulting services in the United States, and ERM has been selected as TowerBrook's primary provider of ESG-related consulting services in the UK/Europe.TowerBrook may also retain other specialist providers, such as Environ and Arcadis for environmental consulting.

Transaction Closing

At signing, TowerBrook's legal team would ensure that investment or shareholders' agreements include, where practicable and applicable, detailed ESG clauses. Furthermore, the legal team seeks to draft such agreements so that they clearly outline how ESG matters would be handled during the life of the investment. Such agreements seek to document what the Portfolio Company commits to undertake in relation to ESG, and to give the TowerBrook funds future leverage should the portfolio company fail to implement what has been agreed. Additionally, such agreements establish specific mechanisms for monitoring ESG activities, such as information and inspection rights. The legal team and investment teams also work to verify due diligence findings via representations and warranties in the purchase agreement, and seek specific indemnification as appropriate.

O No

Mandatory Core Assessed PRI 1,3 Indicate what type of ESG information your organisation typically considers during your private equity investment selection process. Raw data from target company Benchmarks against other companies ✓ Sector level data/benchmarks ☐ Country level data/benchmarks ☐ Reporting standards, industry codes and certifications International initiatives, declarations or standards ☑ Engagements with stakeholders (e.g. customers and suppliers) ✓ Advice from external resources Other, specify We do not track this information Describe how this information is reported to, considered and documented by the Investment Committee or similar. ESG risks and/or ESG-related opportunities are discussed in the investment memoranda presented to the applicable Transaction Committee or Investment Committee. Additionally, all diligence reports by advisors relating to ESG issues are presented to the relevant committee. ESG matters would then be discussed thoroughly, with such discussion including members of TowerBrook's legal team and portfolio group, and also outside consultants if necessary. Consideration of ESG issues would be reflected in the minutes of the Committee meetings, as appropriate. Each final Investment Committee acquisition contains a written section detailing identified ESG risks and ESG opportunities in connection with the proposed opportunity PE 07.3 Private PE 08.2
